

Intern (Assistant Data Specialist, for medics)

£15k – £25k

ABOUT US

Optellum was founded so that every lung disease patient is diagnosed and treated at the earliest possible stage and cured. It is our mission to give lung cancer patients the best chance to fight back. Are you ready to join the fight against cancer and improve the lives of millions of patients? Join the Optellum team and help us shape the lung cancer care of tomorrow!

ROLE TITLE

Internship - Assistant Data Specialist: for students/professionals with a medical background.

ABOUT THE ROLE

- Help bring AI-enabled healthcare products to market
- Review and annotated Chest CTs alongside metadata (spreadsheet-based)
- Check for consistency & improvements for the needs of AI/machine learning systems
- Help create large, curated datasets that will feed into machine learning algorithms
- Develop unique data science skills, while working with a world-class team of AI experts, in close partnership with clinical and data collaborators at some of the world's leading universities and hospitals, such as Oxford University

ABOUT YOU

Required skills (must have):

- Have a medical background (including medical students)
- Comfortable handling Microsoft Excel spreadsheets
- Solid communication skills in English and ability to write clearly
- Obsessive attention to detail
- Ability and desire to learn new skills quickly
- Good organisational skills
- Strong work ethic
- Strong team player

Desirable skills (considered a plus):

- Familiarity with radiology (Chest Computed Tomography) and healthcare IT systems (electronic medical records, PACS)

- Basic data analysis skills in order to effectively import, verify, rearrange & edit data
- Hands-on software development experience
- Basic knowledge of databases or Python coding
- Prior experience in a clinical research environment
- Experience working in a startup or a small- to medium-sized business
- Long-term availability (3+ months), due to the challenging but exciting learning curve

WORK SCHEDULE

- Full-time (for a minimum of 6 weeks) or Part-time (for a minimum of 12 weeks - minimum 20h/week)
- Remote / hybrid work
- Eligibility to work in the UK
- Starting date: January 2023

WHAT WE OFFER

- Rewarding, high-impact work with patient benefit at the heart of what we do
- Friendly, mission-oriented team with a strong sense of teamwork
- Opportunities to connect with serial entrepreneurs, world-leading AI experts and key opinion leaders
- Collaborate closely with clinicians at Oxford University Hospitals and other world-leading institutions
- Competitive salary and additional benefits, which will grow with the company
- Flexible working hours designed around a core period. Additional flexibility may be negotiable
- Potential for a full-time role in our fast-growing company if you demonstrate you have what it takes
- Office in Oxford's beautiful historical centre, with great transport links (5-minute walk to the train station and 1 hour to central London)
